

## **Course Enhancements Update**

Last golf season players were able to enjoy the renovations on the East course, and this spring Arrowhead will unveil its new enhancements to their South Course. Players can now expect to experience the many improvements made to 18 holes (of 27) available at Arrowhead.

### ***The South Course Project Overview***

Fairways were expanded in areas to make the course easier for the average player while new bunkers were added in strategic locations to increase the difficulty level for the more expert player. All bunkers are reshaped, and like the East Course, will include beautiful white sand offering players the ability to hit out with consistency. The total number of bunkers on the course will be increased, but the overall size (square footage) is being decreased. New tee boxes have been added to hole #7 making it a par 5 (previously a par 4), along with adding new tee boxes on hole #8, making it a par 4 (previously a par 5). In addition, a few areas of the cart path have been moved to increase the aesthetic appeal and playability.

*Course Superintendent, Mike Mumper, and the grounds department at Arrowhead would like to invite you to read their inaugural course blog. Look for the debut blog in the spring of 2012.*
